I: BACKGROUND

The Kenya Sugar Board produces a monthly market newsletter that gives insights into the performance of the sugar industry in a given period. Attention is focused on local sugar production, wholesale and retail prices, imports, exports, sugar by-products and the global sugar market outlook. This **December 2025** newsletter gives a comparative analysis of the sugar industry performance in the period January - December 2025 and 2024.

II: INTRODUCTION

a) SUGAR

Total sugarcane milled in December 2025 decreased by 11%, to 709,790 MT from 800,196 MT in November 2025. A total of 7,044,083 MT of sugarcane was milled between January and December 2025, 25% drop from the 9,334,533 MT recorded during the same period in 2024. This significant drop is attributed to a reduced supply of mature cane available for crushing.

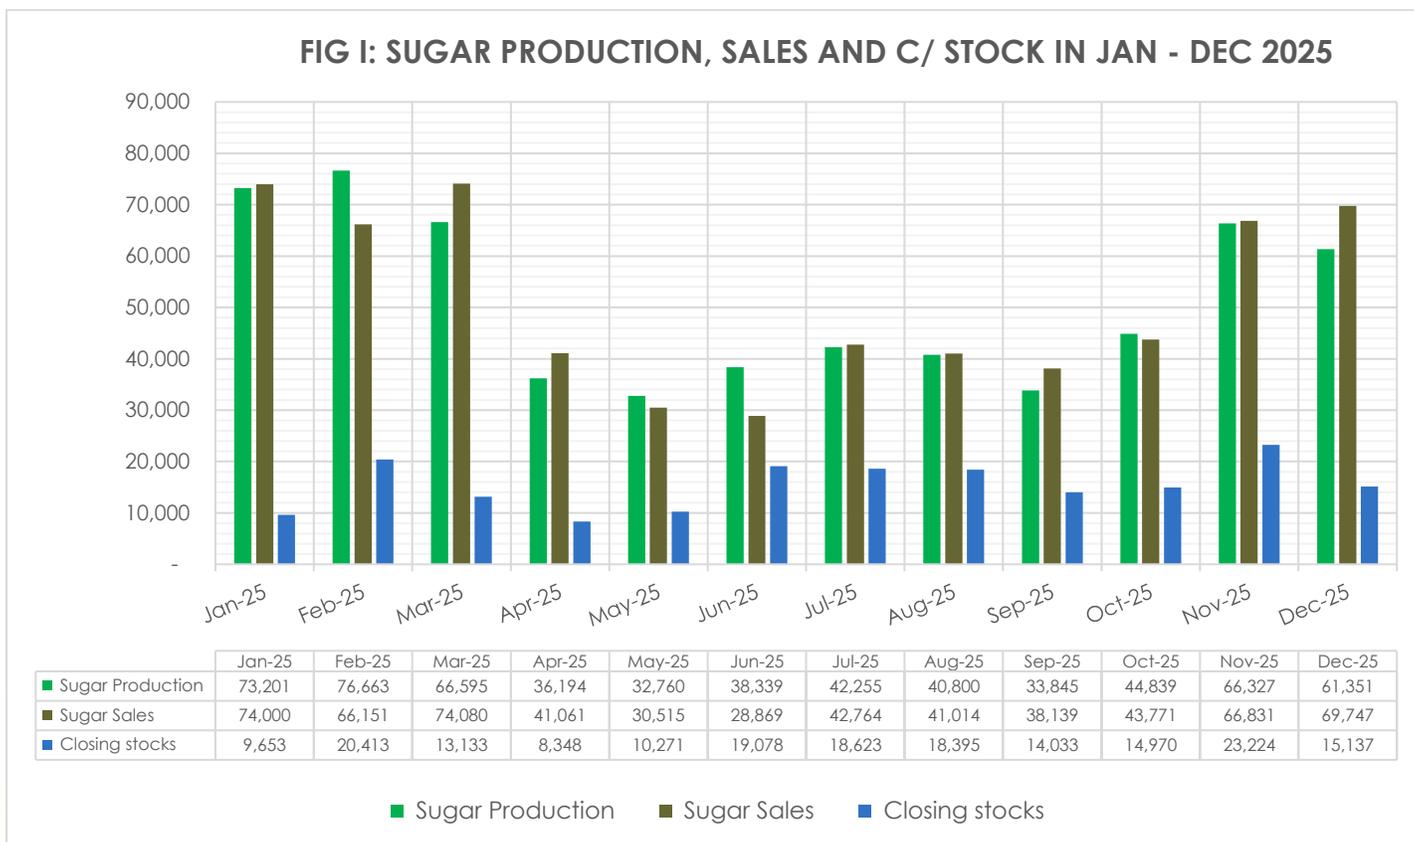

Sugar made decreased by 7% to 61,530 MT from 66,018 MT recorded in November 2025. The industry average tonnes of cane to tonnes of sugar (TC/TS) ratio improved from 12.12 in November to 11.54 in December 2025.

Total sugar production (bagged) in December decreased by 8% to 61,351 MT from 66,327 MT in November 2025. Cumulative sugar production from January to December 2025 totaled 613,169 MT, down 25% from the 815,454 MT produced in the same period last year.

Sugar sales by millers increased by 4% in December 2025, to 69,747 MT, up from 66,831 MT in November 2025.

The review period ended with sugar closing stocks of 15,137MT, down 35% from 23,224 MT in November 2025. More details on sugar production, sales and closing stocks are given on Figure I overleaf.

Figure I: Sugar Production, Sales and Closing Stocks (MT)

b) MOLASSES

In December 2025, molasses production increased by 14% to 33,842 MT from 29,681 MT in November 2025. Cumulatively, molasses produced from January to December 2025 decreased by 28% to 273,264 MT from 377,748 MT in the same period last year.

Molasses sales increased by 3% to 23,353 MT from 22,672 MT in November 2025. The total closing stocks of molasses as at the end of December 2025 were 27,555 MT up 40% from 19,617 MT in November 2025.

In December 2025, molasses prices ranged between Kshs. 18,702 and 25,000 per tonne, with a mean price of Kshs. 21,785 per tonne, down from Kshs. 27,053 per tonne in November 2025. More details on molasses prices are given in Figure II overleaf.

V: WORLD SUGAR MARKET

a) The Market in December 2025

The annual ISO London meetings, held in late November and early December, unfolded against the backdrop of weak sugar prices. A modest recovery in November was followed

by a low-volume, range-bound market in December, reflecting the continued dominance of speculators who maintained short positions throughout 2025.

December saw a continued tailing off in Centre-South (CS) Brazil production while reports from the North-Northeast (NNE) region indicated higher diversion to ethanol and potential reductions in cane availability.

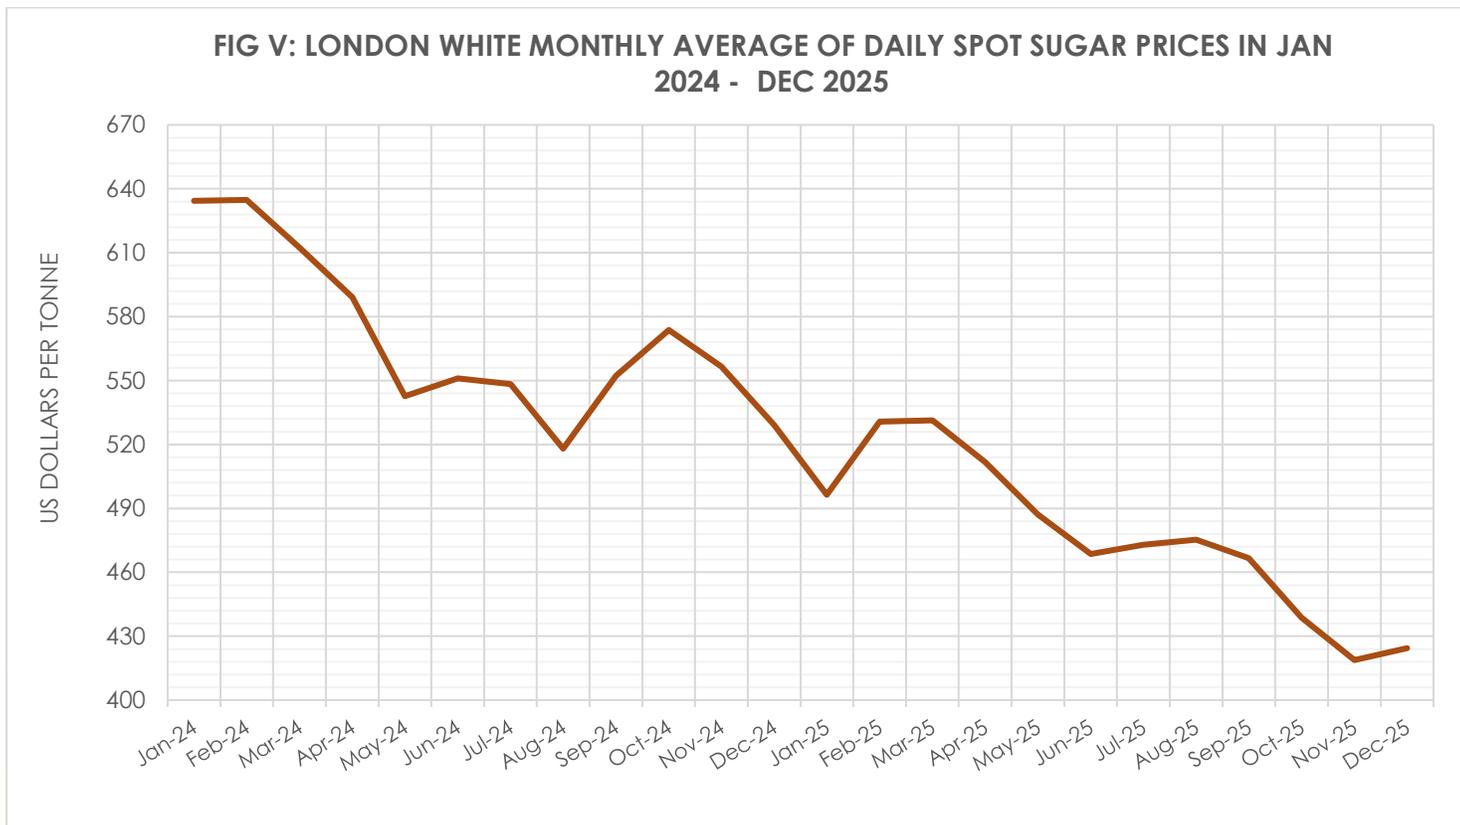

The average ISA Daily Raw Sugar Price in December stood at USD14.66 cents/lb, up 37 points from last month's average, but down USD4.57 cents/lb from one year ago. During December, the range between high and low ISA prices was USD0.80 cents/lb, the narrowest range since September 2022.

The Nominal White Sugar Premium (the difference between the ISO White Sugar Index and the ISA Daily Price), was little changed from last month at USD101.26/tonne from USD103.83/tonne in November and USD103.33/tonne in October.

The ISO's insight into speculative positioning in commodity markets has been curtailed by the federal funding impasse in the US, and the amended publication schedule that will only see the report flow catch up with the latest developments in January.

a) Conditions and Prospects

Early January updates from Covrig Analytics and Rabobank returned surplus estimates for the current 2025/26 season of 3.6 and 2.6 mln tonnes respectively, with the former incorporating a 0.4 mln tonne downward revision in the Thai production outlook while the latter underlined the fact that the current surplus is relatively small. In December, ING had posted a surplus of 7 mln tonnes for 2025/26, with 2024/25 returning a 2 mln tonne deficit. During December, the USDA projected global sugar production to reach 189.3 mln tonnes in 2025/26, up from 181 mln tonnes in the previous season. Consumption is expected to rise from 178.1 mln tonnes in 2024/25 to 180.5 mln tonnes in 2025/26.

Pecege, the Piracicaba-based research and education centre, updated the CS Brazil cane total to 609.6 mln tonnes, returning a cane yield of 74.7 tonnes/ha for the season. This is down 4.9% from last season. Furthermore, the cane yield for November was reported at 63.3 tonnes/ha. This could potentially drag the average down further, although the 17 mln tonnes of cane, between the November-end total and the estimate above, is less than 3% of the total.

VI: WORLD MOLASSES MARKET

Prices

In Europe, sugarcane molasses grades have eased to around EUR180/tonne, while in the US they remain near USD170/ tonne. This marks a sharp contrast to conditions a year ago, when prices in both regions were above USD/EUR 200/tonne. The shift reflects broader trends in the animal feed and molasses markets, where supplies are now more abundant than last year.

Trade

S&P Global Energy note exportable supplies of molasses are expected to increase next year. The rise is due to bigger crops in several parts of the world, combined with two major policy decisions: the end of the prohibitive export tax in India, and the ban on molasses imports in the Philippines (extended to March 2026). Both developments will put downward pressure on cane molasses prices. By contrast, beet molasses will be tighter given the lower crop in Europe.
